

Student Services & Data Exchange

BCcampus manages agile, personalized access to educational information and services using a federated approach across B.C.'s post-secondary system. We facilitate real-time access to student data using our Connector system: a secure electronic pathway linking institutions.

ApplyBC ApplyBC is an online tool that allows students across the province apply to any of the province's post-secondary institutions. ApplyBC collects the applicant's basic personal information and submits it to institutions of the applicant's choice, beginning the application process. Each year, ApplyBC helps more than 100,000 prospective students apply to their chosen institution.

CoursesBC The CoursesBC tool provides an up-to-date directory of online and distance courses available through B.C.'s public post-secondary institutions. Course information is updated daily from all participating institutions. Course transfer information is synchronized with the BC Transfer Database, supported by the BC Council on Admissions and Transfer (BCCAT).

MyCreditsBC MyCreditsBC provides B.C. post-secondary students with the ability to easily retrieve an unofficial course record from institutions they have attended. They can then view course-by-course transferability, according to Transfer Agreements maintained by the Council of Admissions & Transfer (BCCAT). Transcript information is retrieved in real time from each connected institution's student information system the moment a request is made.

Transcript Exchange

The pilot Transcript Exchange service has been developed to demonstrate the efficiencies available by replacing paper transcripts with electronic versions when official student transcripts are exchanged between participating institutions. This standards-based mechanism has been in production since February 2011 for Douglas College, Kwantlen Polytechnic University and Simon Fraser University. Work is underway to extend implementation to the other B.C. public colleges, universities and institutes.

BC Learning Gateway

The BC Learning Gateway, currently in concept development phase, is a design metaphor for the technical tool that will provide information and services from multiple education sector sources. The Gateway will act as an information hub and a federated information service center, gathering and disseminating higher education services, resources, courses, edtech applications and tools to BC's students and citizens. A release date has not yet been established for the first Gateway prototype.
